

## Come and find the commitment that fits you !

The Salon des Solidarités's team is now firmly committed to the organisation of recreational activities for the Salon's third edition, which will take place in June 2010 on Friday 4, Saturday 5 and Sunday 5 in Paris at the Porte de Versailles's exhibition centre. The three-day-long programme is being designed step by step with the active collaboration of the steering committee's members with the aim of a more participative Salon.

The Salon des Solidarités will actually feature :

**A place of debate and thoughts...** with numerous conferences to be anchored by quality speakers, all of them are specialists in their field. Conferences for all audiences : professionals, the general public, the young, the elder, the working population, the retired population. And more specifically a conference presenting a comprehensive view on the diversity of commitment possibilities regardless of one's age or status.

**Various animated spaces...** such as a MDG (Millennium Development Goals) village that encompassed 8 stands - one for each of the 8 MDG - where you will find games or entertainment related to MDG themes.

**A web space...** where unlimited Internet access will be offered during the three-day-long Salon and where the public will among other things test on line educational games related to international solidarity.

**A space for an early sensibilisation to solidarity...** made to make kids aged from 4 to 12 years old aware of international solidarity by means of games and initiations to world cultures.

**A school route...** to welcome elementary and secondary school classes and the teachers in charge on Friday, to meet solidarity actors and get further knowledge of this sector's issues, which appear more and more often in official educational programmes.

Everyone will find during the Salon an activity that fits their profile while keeping in mind that we can all be solidarity actors. Thanks to the Salon which highlights of the diversity and the complementarity between all of these actors as an objective, the general public will embrace solidarity issues and everyone will find the commitment that fits them.
